COMPANY PROFILE

Kareema Industry, Inc. the most trustworthy partner you can find in building material industry in China.

We know clearly that only by helping our customers to achieve success in controlling the cost and occupying the relative market can we achieve success in this same field.

Motivated by that basic belief, Kareema set out to work. By importing the most advanced facilities, using only the top grade natural materials, and setting up a strict quality control system, we have made our products equality to better performance and stability. Our experienced design and engineering team is second to none in making superb fashionable styles and supplying help in your own design. And we never reduce our cost by sacrificing the quality. Actually we reduce the cost by centralized production and effective logistic management. We have setup a strong relationship with competitive logistic company because of our big exporting quantity.

With the quality products, competitive prices, and professional staffs dedicated to prompt services, Kareema has the confidence to assure your full satisfaction. When it comes to customer support, on-time delivery, and new products output, Kareema is an industry leader. Due to years of effort, Kareema has made itself the fastest growing and the most professional company in China. Now as one of the top 4 building material suppliers, we are exporting more than 600 containers per month.

For Kareema however, producing building materials is more than a business: it's a passion to be the best. Let us know how we can help; it would be our pleasure to work with you on your ideas and projects.

Production line (Рекомендация)

Kareema laminate Door Production Base

1
Selecting high quality raw material of melamine board.

2
Cutting melamine board based on customized design to make door leaf and frame.

3
Assembling firwood as skeleton and filling different materials into door leaf.

4
Cold Pressing: Glue the melamine boards on both sides, do cold pressing to make sure permanent stability.

5
Drilling grooves to the frame and holes for hardware

6
Do lipping on the door leaf

7
Packing MDF Doors after inspection by foam + corner protector + Special Export Carton Box

8
Storage of finished MDF Doors in clean and dry place

Product performance
Stability:
High-density raw material,life-time using
Workable:
Very good at machining,could be cut,drilled and painted
High resistance:
High resistance for cracking and losing shape,fire proofed,heat proofed,water proofed,termite proofed
Finsihing:
no color difference,could be finished with verneer,PVC film,decoration paper,heat transfer and painting.
Environment-friendly:
recyclable,no formal dehyde
Customization:
customizedsize and design
