MDI ecological adhesive without formaldehyde addition

Leading the wooden door industry into a new era of formaldehyde free

The strictest new national standard ENF is implemented in production

Formaldehyde free is healthy!

**The concept of environmental protection and sustainable development
Multiple international authoritative recognitions**

NEW

UPGRADE

**BLUE CARBON CRYSTAL
HEALTH BOARD**

7 strong selling points are coming

ENF

Health and Environmental Protection

Sustainable release of negative ions, purifying the air, and safeguarding the health of family members.

Clean formaldehyde antibacterial

Can purify residual formaldehyde and mold in new house decoration, freshen the air, and reduce allergies.

Thermal insulation and noise reduction

The preferred material is nano high-density material, and the thickened panel has good sound insulation and heat insulation.

Moisture and mold prevention

Superior water resistance, extremely low water absorption and expansion rate, making it easy to cope with daily humid environments.

Wear resistant and scratch resistant

Panel density is higher, scratch resistance is stronger, and daily use is more reassuring.

Direct sunlight does not fade

Adopting imported veneer, resistant to level 5 ultraviolet rays, and not fading even in direct sunlight.

Anti-insect

Made from wooden veneer as raw material, with insect proof function through veneer treatment or adhesive mixing method.

formaldehyde emission $\leq 0.025\text{mg}/\text{m}^3$

Formaldehyde free addition
The strictest environmental standards

BREATHING NATURALLY EMBRACE A FORMALDEHYDE FREE LIFESTYLE

Blue carbon crystal health board
carbon crystal health board

Blue carbon crystal health board is made of selected natural materials,
Bringing you a pure experience that is close to nature.
Every moment of breathing is worth cherishing.
Let fresh and natural air flow in your beloved home.
Take immediate action to invest in your and your family's health,
Let's build a zero formaldehyde green home together.

FIRE DOORS

Wooden insulated fire doors are developed in accordance with the national standard **GB12955-2008 "Fire Doors"**, and have been inspected and qualified by the National Testing Center, meeting the requirements of Class A and Class B fire prevention. They have also passed the type approval of the Fire Product Qualification Assessment Center of the Ministry of Public Security.

Material selection and performance description:

Door frame: Made of high-quality wood that has undergone fire-resistant and flame-retardant treatment;

Door leaf: The inner frame is made of flame-retardant wood with double-sided glass magnesium flat panels, and the door leaf is filled with perlite fireproof door core panels, with various decorative panels pasted on the surface; Hardware: Fireproof locks, fireproof door closers, fireproof hinges, etc.:

Fire resistance limit: Class A 1.5H, Class B 1.0h; **Sound insulation effect:** Satisfactory sound insulation effect.

Door leaf section

- Wooden Dragon Skeleton
- Expanded perlite board
- Multi layer decorative panel
- LAMINATE

Fireproof slate cotton board

Door frame cross-section

- Multi layer decorative panel
- Solid wood door frame
- Fireproof strip

Guarding the Barrier of Life Choose our fire doors!!!

A barrier to protect life

Between safety and life,
The fire door is the inconspicuous but
crucial protective barrier.
Our fire doors are not just doors,
It is also a commitment to life.

SILENT DOOR

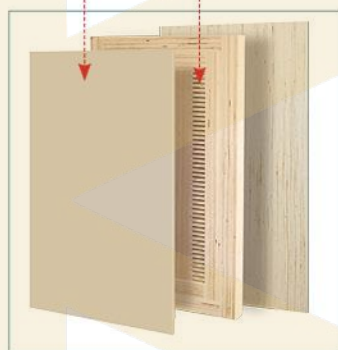

ENF grade formaldehyde emission $\leq 0.025\text{mg/m}^3$
Formaldehyde free addition
The strictest environmental standards

SILENT UPGRADE, MAKE YOUR HOME QUIETER!

Door leaf lifting mute strip

Close the wooden door and press down the sealing strip to lower the collision head, When opened, the collision head rises away from the door frame sealing strip and has functions such as dust prevention, sound insulation, and insect prevention.

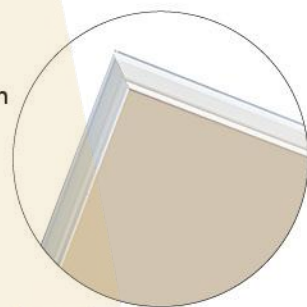

Wood mechanics board door core

High stability;
Better sound insulation;
Higher environmental performance.

45° oblique soft magnetic suction

Magnetic strip, efficient sound insulation and noise reduction.

 (Maximum height&width)

FOLDING DOOR

The design intention of folding doors is to save space. When the doors open, they can be neatly folded on one side without taking up additional indoor space. This makes them particularly suitable for flexible layouts such as small apartments, apartments, offices, and commercial spaces.

SPACE life

Interpreting a minimalist and fashionable texture that blends modern popular elements to bring spatial aesthetics to the extreme, creating subtle and exciting details through the outline of simple lines.

WOODEN DOORS.

NEW HORIZONS

STRENGTH ORIENTED DISPLAY

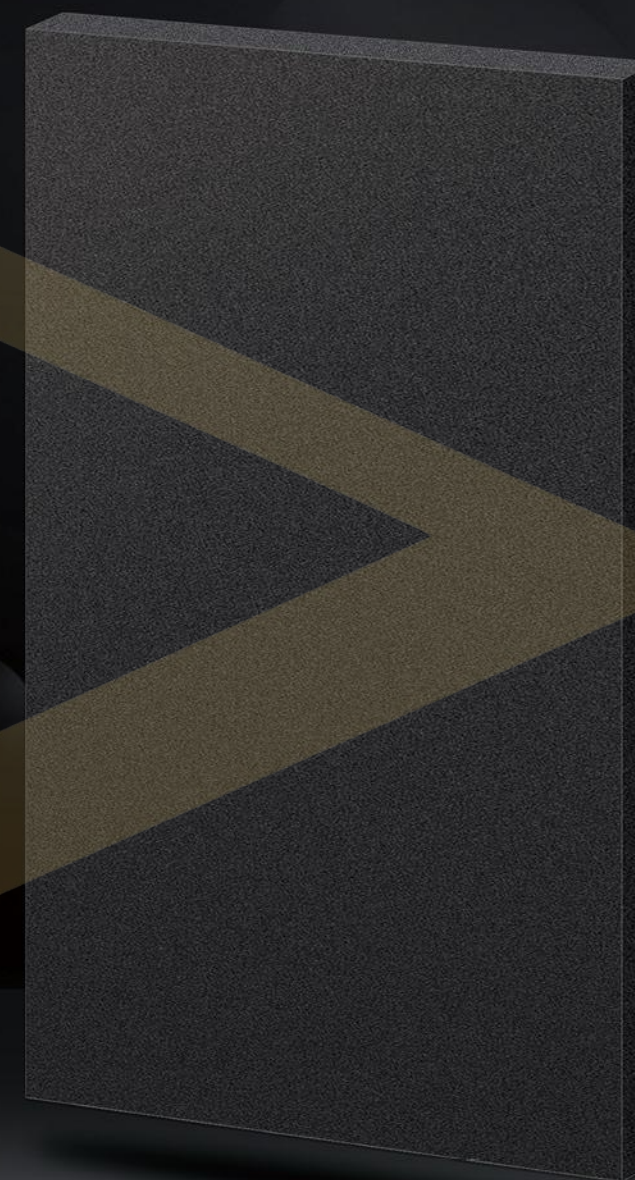

THE COMBINATION OF TECHNOLOGY
AND TECHNOLOGY

Contains micro black crystal particles, made by marine-
grade technology, reaching metal-grade hardness:
waterproof performance test soaked for 72 hours without cracking
and corrosion: The surface effect of high-Pre combustion is not ignited,
and it has good flame retardant properties; the surface is wear-resistant,
scratch-resistant, and has a high environmental protection level.
