Product Characteristics

Product characteristics

1、Low water absorption rate

Its absorption is below 0.3 which is far lower than the europe standard and natural stone material.no matter

How long it is used.it won't change its color and remains new for ever.

2,High wearability:

Lt is fired by high temperature so its hardness can reach mos8,rate of wearability<140mm³.

3.Acid-resistance:

The acid rain has become the main reason of enviroment.They are also strict with its quality so its size is so Even and smooth that it is easy to construct.

4.Consistent size

Utilizes fully computerized production and testing equipment,strict quality management for consistent size, good surface flatness and ease of construction.

5.Safety and envirement protect:

They choose high quality raw materials and itspattern hasn't got any radiative radon entirely.It is not only of Ahigh uality but also a safe constructive material.
