

KAREEMA SMART HOTEL

Extreme experience Save energy Empowering hotels

What is Smart Hotel

SMART HOTEL

The concept of smart hotel

A smart hotel is a type of hotel that relies on the latest technologies such as IoT, artificial intelligence and cloud computing to provide customers with a more convenient, comfortable and intelligent accommodation environment and experience, while also improving hotel operating efficiency and reducing energy consumption.

Smart System

The value of Smart Hotel

Improve brands

We provide high appearance quality, fine workmanship, convenient and intelligent functional design products. All the products make a comfortable stay experience to the customers. At the same time, these products are effectively enhancing the image of the hotel brand.

Comfortable experience

From the lobby to the guest room, the intelligent system automatically triggers intelligent control based on the customer's walking trajectory. The intelligent scene modes in the guest room create a homely feeling for guests.

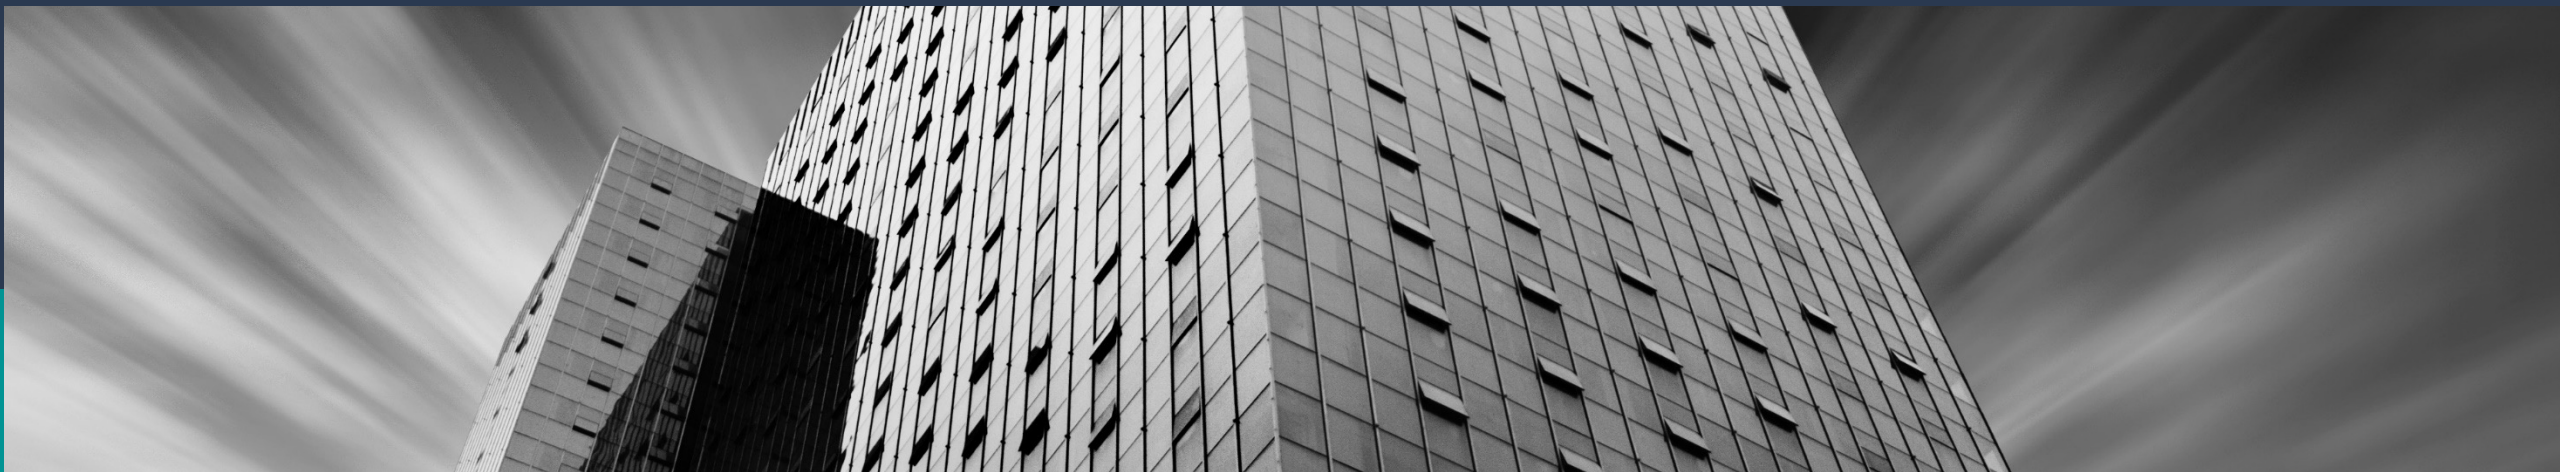

Saving energy

The smart system provides Daytime, nighttime, early morning, cleaning scene modes for lobby. The smart system in the guest room can automatically turn off electrical equipment when guests leave. The automation control execution can save a large amount of electricity costs for hotels every year, making it a one-time investment with long-term benefits.

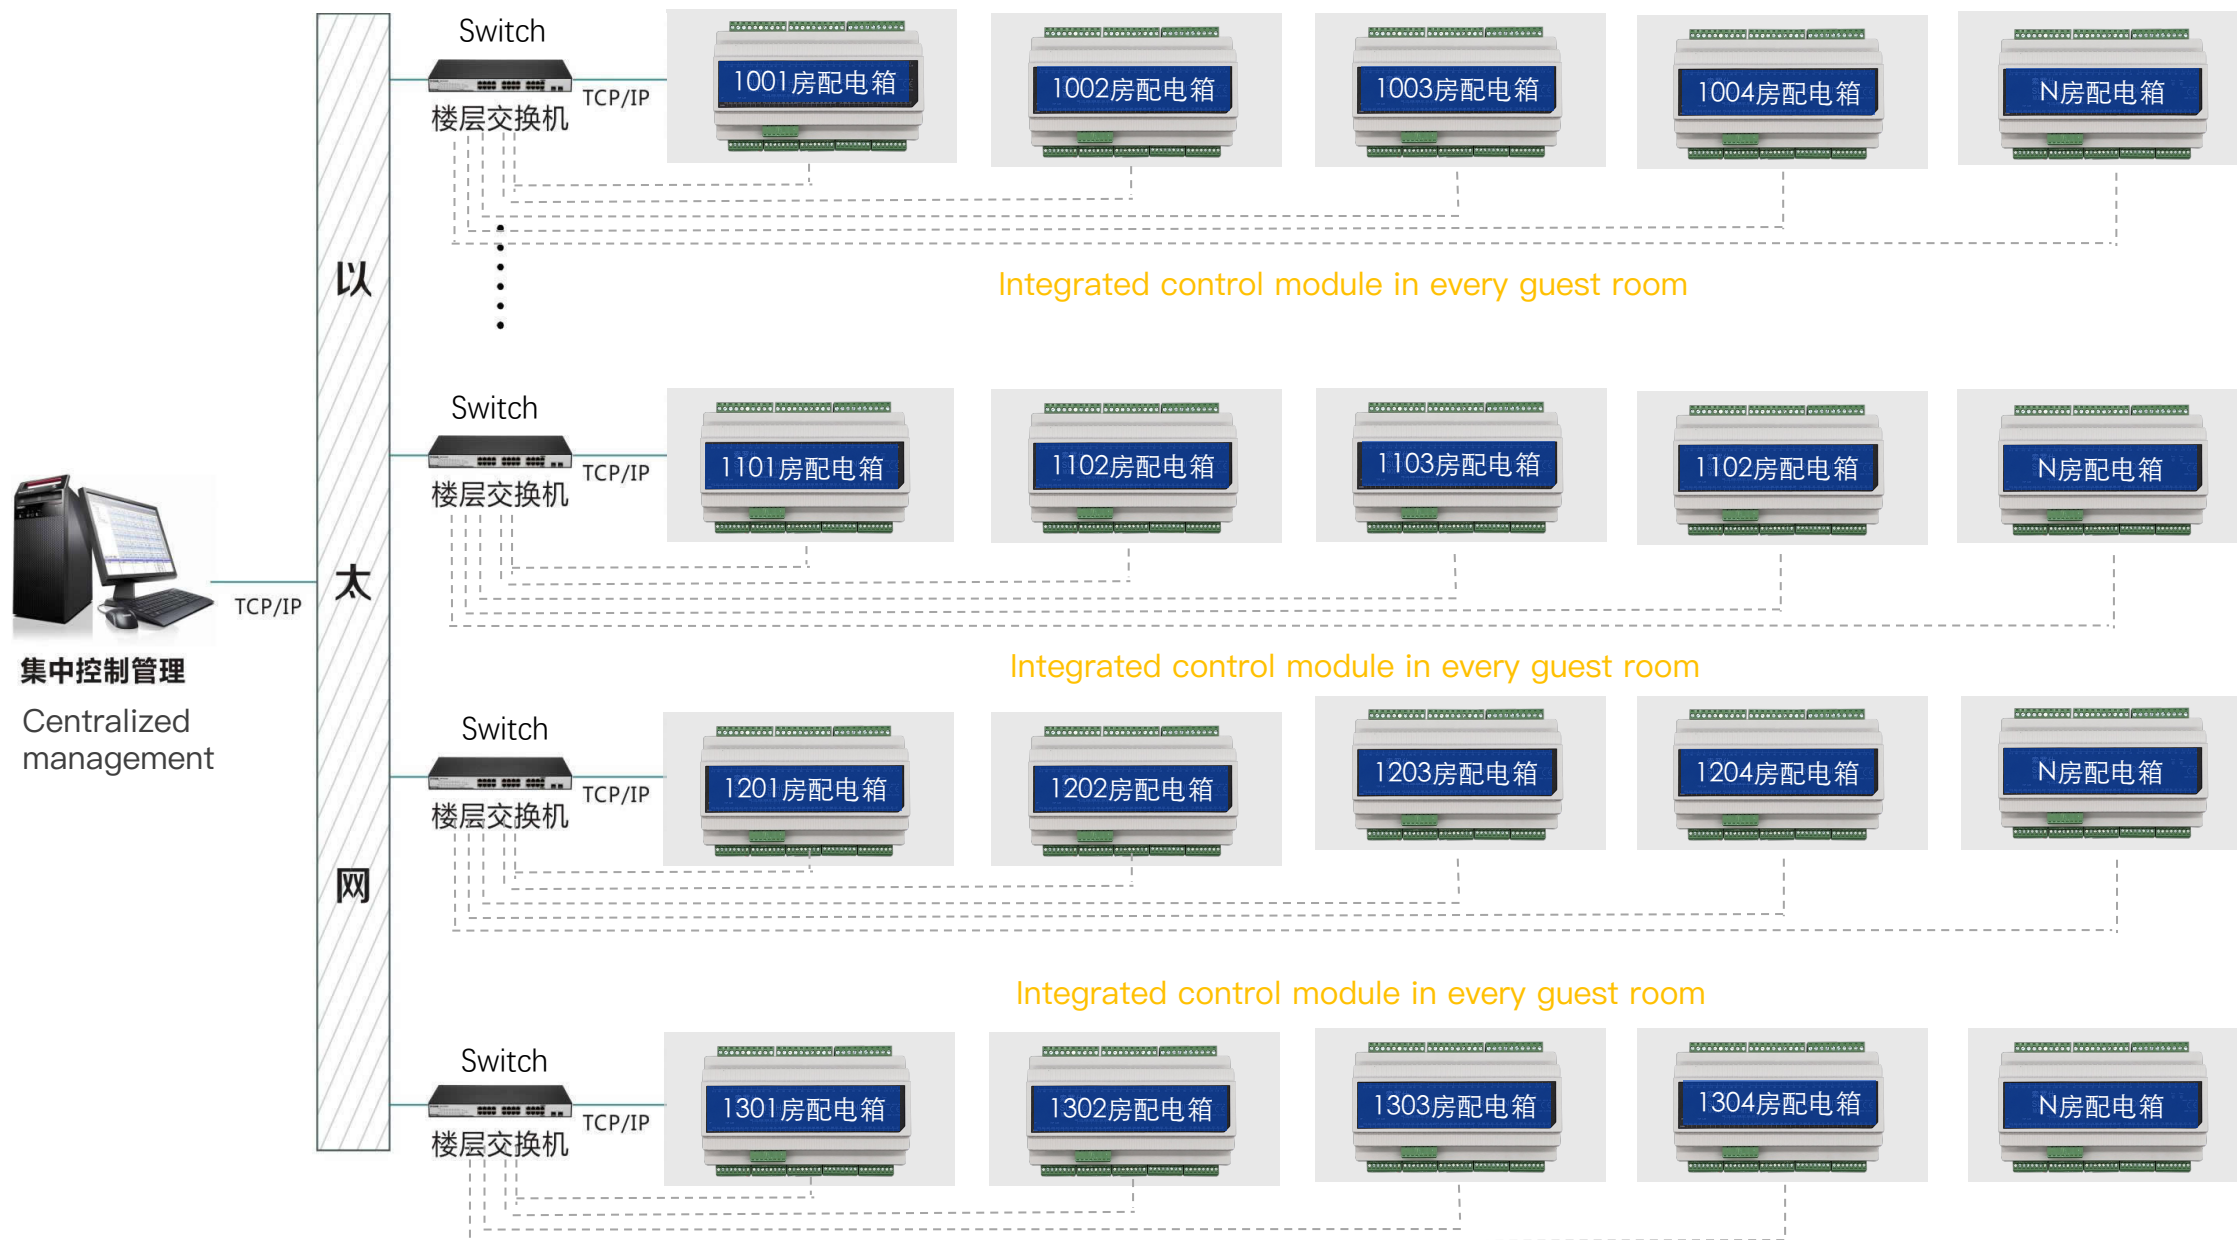

Increase the rate of repeat stays

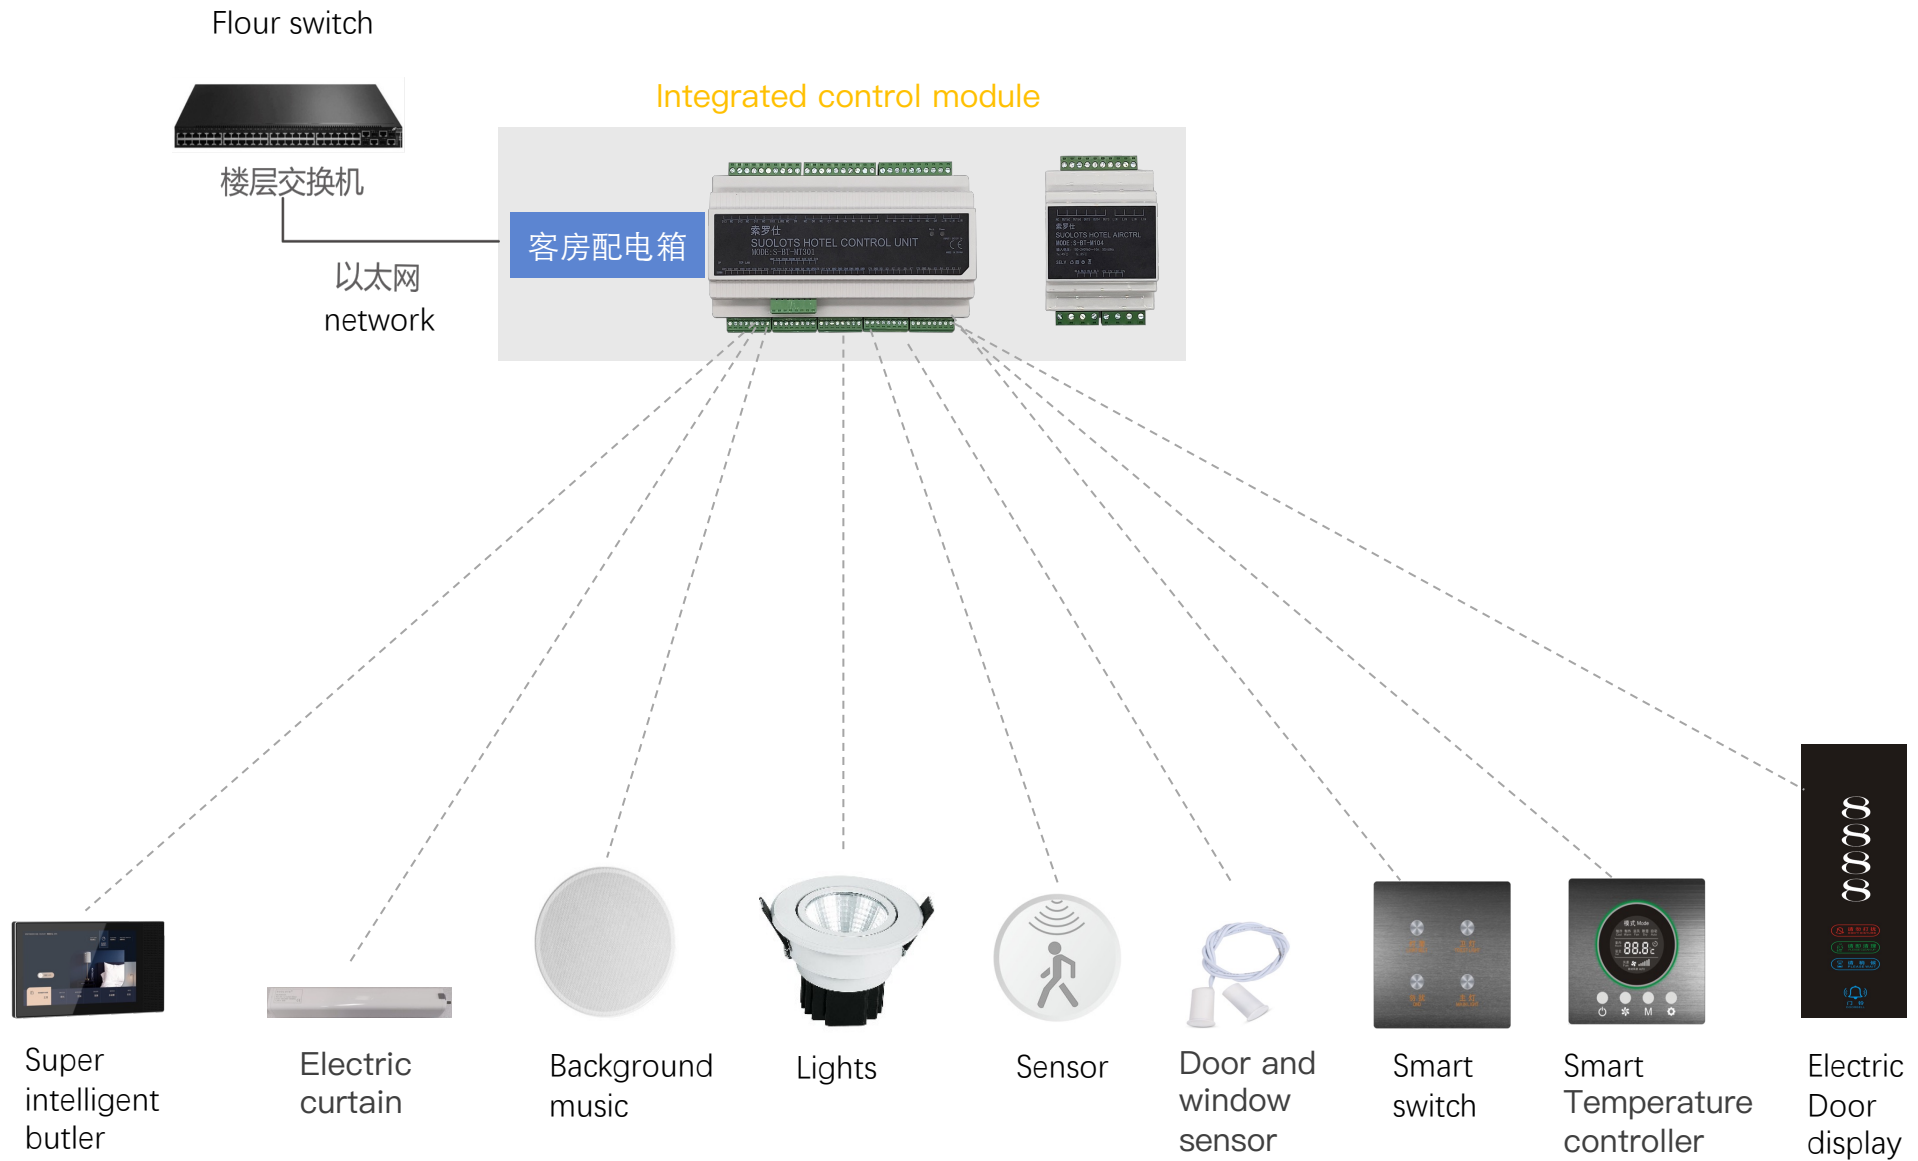

In this era of big intelligence, smart hotels will be ubiquitous like wireless networks in every hotel in the future. Seizing opportunities, improving customer experiences, increasing customer loyalty, strengthening hotel competitiveness, and effectively increasing the rate of repeat stays.

SULOTIONS

Standard solution

- 1、Door display
- 2、Smart lighting system
- 3、Shading system
- 4、Smart control system
- 5、Smart voice control system

The most basically system with normally smart system. This is the the highest cost-performance ratio.

Card-free power supply Solution

- 1、Door display
- 2、Smart lighting system
- 3、Shading system
- 4、Smart control system
- 5、Smart voice control system
- 6、Intelligent sensing system

The highlight of card-free solution is adding sensing light, wireless door open, and turn off all power when guests leave without taking out the room card. It saves power for the hotel.

Light dimming solution

- 1、Door display
- 2、Smart lighting system
- 3、Shading system
- 4、Smart control system
- 5、Smart voice control system
- 6、Smart lights dimming system

The dimming solution improves the visual experience of the entire guest room and is a highlight of smart hotels in recent years. This solution includes lighting fixtures in the guest room.

Luxury Solution

- 1、 Door display
- 2、 Smart lighting system
- 3、 Shading system
- 4、 Smart control system
- 5、 Smart voice control system
- 6、 Intelligent sensing system
- 7、 Super intelligent butler

A single screen (super intelligent butler) can control all devices in the guest room.

Unattended solution

- 1、 Door display
- 2、 Smart lighting system
- 3、 Shading system
- 4、 Smart control system
- 5、 Smart voice control system
- 6、 Intelligent sensing system
- 7、 Smart door locker
- 8、 Super intelligent butler
- 9、 Self-check-in system
- 10、 Elevator control system

The real people-free work environment. Guests can finish check-in without customer service.

4

Project conclusion and
delivery

Services Process

communication and scheme design

After contacting and communicating with the customers, we will provide professional smart hotel solution design and create intelligent solutions based on the overall positioning and style of the hotel

1

Design deepening and construction docking

Based on the final version solution and site construction docking, we will follow up on site wiring ad location verification to ensure accurate work during the wiring stage and no omissions

3

Business negotiation and contract signing

Based on the specific needs of the hotel, we will determine the final solution and sign a formal service contract with the customer

2

Services Process

Equipment installation and functional debugging

According to the progress of the on-site construction, enter the field in batches according to the sequence, and perform device installation and intelligent scene debugging .

4

Completion acceptance, handover, and delivery

After the equipment is installed and debugged, the functions are demonstrated and accepted on site, and the staff of the hotel are trained before being formally delivered to the customer

5

After-sales service and experience optimization

We provide our customers with 7 days/week+12 hrs./day standard after-sales service every week, rapid response, single-person responsibility after-sales tracking processing until problem-solving, and function optimization based on unit time period usage scenarios for intelligent systems.

6

Scheme design

Position

Economic, boutique, luxury, four-star, five-star, and ultra-five-star hotels. Usually, the higher intelligent configurations as their grades become higher

Experience

Convenient and comfortable intelligent system control, designed with experiential intelligent scene modes, providing better intelligent experiences for staying guests

Budget

As far as possible, when designing the scheme within the budget range, consider the overall budget and overall functional design of intelligence by the party concerned

Saving energy

Through the design of energy-saving mechanisms for lights and air conditioners in guest rooms and lobbies, as well as timing and scene controls, the hotel can save electricity in the long term

WELCOME

The door light turns on slowly, play the hotel's welcome speech, sequentially opens the lights and curtains, adjusts the air conditioner to a comfortable temperature and mode, creating a warm and welcoming atmosphere .

BRIGHT

Sthe bright mode by one button, turning on all the lights in the room. The bright light environment gives customers a sense of security in an unfamiliar environment

WARM

Turn on the bedside lamp and window ledge lamp, adjust the brightness of the lights gradually, turn off some of the lights, and automatically adjust the air conditioner to a comfortable temperature, bringing a warm and comfortable bedroom environment to customers

SLEEP

Start the sleep mode by one button, the lights gradually dim until they are turned off, the floor nightlight automatically turns on, the air conditioning system automatically adjusts to a comfortable temperature, the TV is turned off, and you enter a beautiful dreamland .

1、Free On-Site Service

One-Year Free On-Site Service from Project Acceptance

2、Hardware Warranty

RCU products come with a free warranty of 5 years, other expansion products come with a warranty of 2 years

3、Response Time

For urgent faults, we provide on-site service within 4 hours; for general faults, we provide on-site service and resolution within 24 hours; for difficult-to-diagnose faults (involving replacement of main components), we aim to resolve them within 5 working days.

4、Out-of-Warranty

After the product goes out of warranty, we charge a flat fee per visit for on-site services plus the cost of hardware replacements.

Service Standards

Advantages

Technology

The technical team comes from overseas studies, has worked at multinational companies such as Huawei, and has industry-leading technical reserves

Focus

KAREEMA is an enterprise focusing on smart hotel research and development. We provide wire and wireless smart hotel products, resulting in high customer return rates

Rich products

A wide variety of products leading the industry's development, rich ecological products using wired 485 communication protocols, safe, stable and with strong expansion capabilities ;

Service Outlets

Nationwide ground service outlets covering project matching, engineering implementation, and localized services and we are seeking abroad chances

Service & support

We offer hotels comprehensive intelligent design, on-site services, technical support, post-sale warranty services, etc. for our hotel clients

Long-term warranty

5+2 Warranty Plan: Core central control products are warranted for 5 years, while surrounding auxiliary products are warranted for 2 years.
